SUBJECT INDEX TO VOLUME 117

Thermal and fluid design

Analysis of temperature noise propagation in fast breeder core by the two-equation model, T. Yamamoto, T. Takeda, T. Sekiya, H. Nakamura and M. Kamei 117 (1989) 169
Rupture of a high pressure gas or steam pipe in a tunnel: a preliminary investigation of the jet thrust exerted on a tunnel barrier, M.R. Baum 117 (1989) 235
Air–water model studies of cocurrent flow into and along the PWR hot leg to the steam generator, G.C. Gardner 117 (1989) 251
Automatic controller for steam generator water level during low power operation, J.I. Choi, J.E. Meyer and D.D. Lanning 117 (1989) 263
On the applicability of Ishii's similarity parameters to integral system test facilities, Z. Wang, Y.Y. Hsu, K. Almenas and M. DiMarzo 117 (1989) 317
Study on post-BT heat transfer in a full scale BWR (8 × 8) rod bundle, M. Akiyama, A. Inoue, M. Ohishi, S. Morooka, A. Hoshide, T. Ishizuka and K. Yoshimura 117 (1989) 341

Engineering mechanics

Transient failure analysis of liquid-filled shells – Part I: Theory, W.K. Liu and R.A. Uras 117 (1989) 107
Transient failure analysis of liquid-filled shells – Part II: Applications, W.K. Liu and R.A. Uras 177 (1989) 141
Transient thermal stresses due to a zonal heat source moving back and forth over the surface on an infinite plate, N. Sumi and R.B. Hetnarski 117 (1989) 159

Materials properties

Creep crack growth assessment by means of a crack tip/far field concept, J. Ewald, K. Maile and R. Tscheuschner 117 (1989) 185
An embrittlement rate effect deduced from HFIR that may impact LWR vessel support life expectancy, R.D. Cheverton, F.B. Kam, R.K. Nanstad and G.C. Robinson 117 (1989) 349

Mechanical design, component fabrication and testing

Analysis of a stiffener intersection eccentricity in a steel containment, J.D. Rogers and L.F. Greimann 117 (1989) 85
Strain-based failure criteria for steel containments, F. Fanous and L.F. Greimann 117 (1989) 93
Creep crack growth assessment by means of a crack tip/far field concept, J. Ewald, K. Maile and R. Tscheuschner 117 (1989) 185
Research and development of selected components of the High-Temperature Reactor for process heat generation, W. Theymann and G. Lange 117 (1989) 287
The design of the prestressed concrete reactor vessel for gas-cooled heating reactors, G. Becker, G. Steffen and C. Notheisen 117 (1989) 333

Safeguard engineering

Environmental impact of "controlled" radioactivity release, V.T. Ionescu 117 (1989) 1

Structural design, construction methods and testing

Structural evolution of containment for Indian PHWRs, A. Kakodkar, H.S. Kushwaha and B.K. Dutta 117 (1989) 33
Fast breeder reactor building, severe accident loading and ultimate capacity, J. Langhans 117 (1989) 51
Lifetime integrity requirements for containments in the United States, R.F. Sammataro 117 (1989) 67
Implications of results from full-scale tests of reinforced and prestressed concrete containments, N.W. Hanson, D.M. Schultz and H.T. Tang 117 (1989) 79
Rupture of a high pressure gas or steam pipe in a tunnel: a preliminary investigation of the jet thrust exerted on a tunnel barrier, M.R. Baum 117 (1989) 235
Accuracy of dynamic calculations using shell models under local impulse loading, E. Bielor, M. Freiman and N.J. Krutzik 117 (1989) 299
Nonlinear calculations for concrete structures related to prediction of crack propagation and material removal, N.J. Krutzik, M. Freiman and R. Tropp 117 (1989) 309

The design of the prestressed concrete reactor vessel for gas-cooled heating reactors, G. Becker, G. Steffen and C. Notheisen 117 (1989) 333

Radiation shielding

Transmission characteristics of Cf^{252} neutrons passing through rare earth and boron loaded concrete slab shields, B.S. Seshadri and R. Venkatesan 117 (1989) 325

System control and controls

Expert system applications to nuclear power for enhancement of productivity and performance, J.A. Naser, D.G. Cain, B.K.-H. Sun, R.W. Colley, N.S. Hirota and F.E. Gelhaus 117 (1989) 275

Core physics and fuel design

Containment loadings from melt–concrete interaction, H. Alsmeyer 117 (1989) 45

The D-COM blind problem on fission gas release: the predictions of the TRANSURANUS and FUTURE codes, C.T. Walker, K. Lassmann, C. Ronchi, M. Coquerelle and M. Mogensen 117 (1989) 211

Nuclear safety

Environmental impact of "controlled" radioactivity release, V.T. Ionescu 117 (1989) 1

Accident management measures to prevent accidents or to mitigate its consequences for LWRs in the FRG, E.F. Hicken 117 (1989) 7

Mitigation of severe accident consequences by the containment design of KWU-LWR, J. Czech, H. Fabian, P. Gast and O. Gremm 117 (1989) 11

Severe accident mitigation programme for the Forsmark and Ringhals plants, R. Espefält 117 (1989) 19

Filtered venting considerations of an ice condenser containment, H. Tuomisto 117 (1989) 25

Containment loadings from melt–concrete interaction, H. Alsmeyer 117 (1989) 45

Fast breeder reactor building, severe accident loading and ultimate capacity, J. Langhans 117 (1989) 51

Lifetime integrity requirements for containments in the United States, R.F. Sammataro 117 (1989) 67

On the applicability of Ishii's similarity parameters to integral system test facilities, Z. Wang, Y.Y. Hsu, K. Almenas and M. DiMarzo 117 (1989) 317
